

TESTING FACILITY

- In accordance with international standards like ASTM B68, B75 & B280; JIS H-3300, EN, AS/NZS and to ensure that the finished product is 100% full proof we have a world class testing facility in place with state of the art testing instruments.
- We have following testing process and instruments to meet the above standards:

- **Microscopic Examination**
- **Metallurgical Test - Grain Size Testing**

Microscope

**Hardness Testing
Equipment**

- **Non-destructive Testing**

Online Eddy Current Testing – We ensure that every meter of the tube passes through Eddy Current Testing.

- **Chemical Composition Testing**
 - Spectro Analysis

- **Mechanical Tests**

- Tensile Elongation,
- Hardness Testing

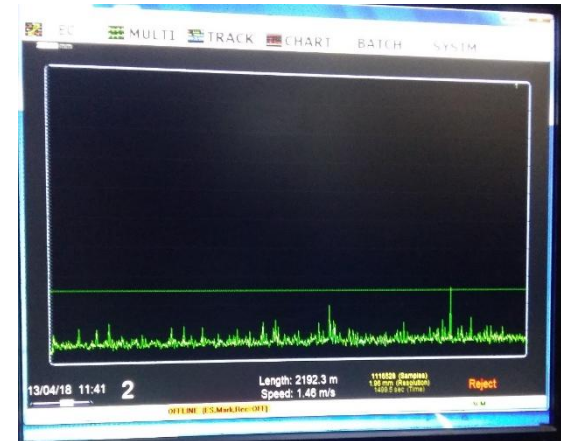

- **Cleanliness Test - Contamination Tests.**

Universal Testing Machine

Contamination Testing Kit
